### Pedigree Analysis on Profile In Style (USA) and Glacial Gold (USA)

When we first purchased [Profile In Style \(USA\)](#) and then our magnificent cremello thoroughbred stallion [Glacial Gold \(USA\)](#), we asked a Racing Industry Pedigree Dynamics Analyst for their thoughts and an analysis on their pedigrees. Below are excerpts from them.

**(Profile)** *“What will be most fascinating about breeding to **Profile** with intent to race the progeny, will be how he responds to the more commercial and successful branches stemming from the key individuals he carries in his pedigree (Bold Ruler, Halo, Mahmoud etc). While obviously his own immediate ancestors are for the most part not the prime commercial conduits for their respective bloodlines, they still carry valuable genetic material pertaining to those lines – and it is quite possible that in some matings, the interaction between the commercial ancestors carried by mares mated to him, meeting with their less well known relatives or close genetic allies carried by **Profile**, will create something that could almost be called “hybrid vigor” of a sort - given how long the TB studbook has been closed and how in-*

**(Glacial Gold)** *“Milkie is a tail male descendant of the mighty Mahmoud through the race winner Deer Lodge, his sire. The sire (Deerlands) and grandsire (Mount Marcy) of Deer Lodge were also winners – Mount Marcy (son of Mahmoud) was a very good racehorse RF inbred to his own ancestress the great mare Sylvabelle – ancestress of Broomstick (champion sire) by Ben Brush. These bloodlines so prominent in Milkie achieved their ultimate racetrack expression through epochal sires such as **Native Dancer, Bold Ruler, Raise A Native** and his son **Mr Prospector**.....Glacial Gold’s own family is 5-c.*

the studbook has been closed and now intensely overbred some of these major lines are to just a handful of individuals. This has the potential for positive results."

He is from the same tribe as the Mr Prospector son **SEEKING THE GOLD**.

Make sure you get that "hybrid vigour" and those eye-popping colours into your racers that will inevitably have more value, career possibilities and give you more fun post racing - **even the geldings!** Read our stallions full, in-depth reports [here](#) & [here](#).
