PETA BUYS UP AT PATINACKS REDUCTION SALE

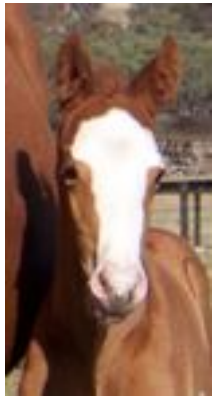

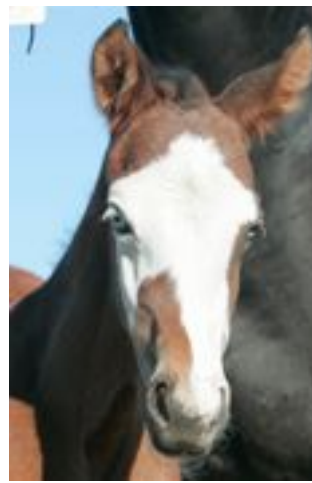

It was a great day out when I jumped on a plane to Gold Coast to attend Nathan Tinkler's Patinack farm unresearved broodmare sale. Pleased to say that I got myself an outstanding mare. (Oh and also pleased to say that when I went to the lavatory my mother and Dr Deanne Hummelstad bought another mare!!)

The mare 'I' bought is Affrettarsi. I picked the mare on type and think she's about a good a type as a blood horse could get. With more black type in her pedigree than a newspaper(!), and previously sold (twice) for \$100K her quality translates to results.

Issue 21, 27 November 2012

PROFILE NINE OVERO THOROUGHBREDS FOR NINE TB FOALS!!!

You probably didn't know (though we did!!) Profile In Style (USA) has more colour modifying genes than his loudly coloured sire, Ellusive Quest. Profile's blue eyes and this seasons nine overo foals out of nine standard coloured Tb mares, adds homage to this fact. **With a World's first [roan overo](#) TB for Profile, the future sure is looking flashy!!**

GLACIAL GOLD'S OFFSPRING GOBSMACKING FOR GOOD REASON.

[Glacial Gold's](#) progeny's are dropping tongues all over and there is a good explanation for the outstanding types he is throwing.

Forgetting that his damline is littered with black type (his second dam is an eight times racewinner, his third dam a Group 3 winner of seven races and his fourth dam a Group 1 winner of six races (as reported in Breeding & Racing)); to get his amazing colour, Glacial Gold is inbred & linebred to Milkie. Milkie is a direct male decendent of **Mahmoud** and all via RACWINNING SIRES.

Another genetically superior and prepotent stallion that comes to mind that is linebred to Mahmoud is none other than DANEHILL. Danehill is INBRED to his ancestress, Natalma. Natalma's maternal sire is Mahmoud.

Glacial's foals are extremely developed in musculature and are very robust and tough individuals (and very similar in type to the mighty Danehill's).

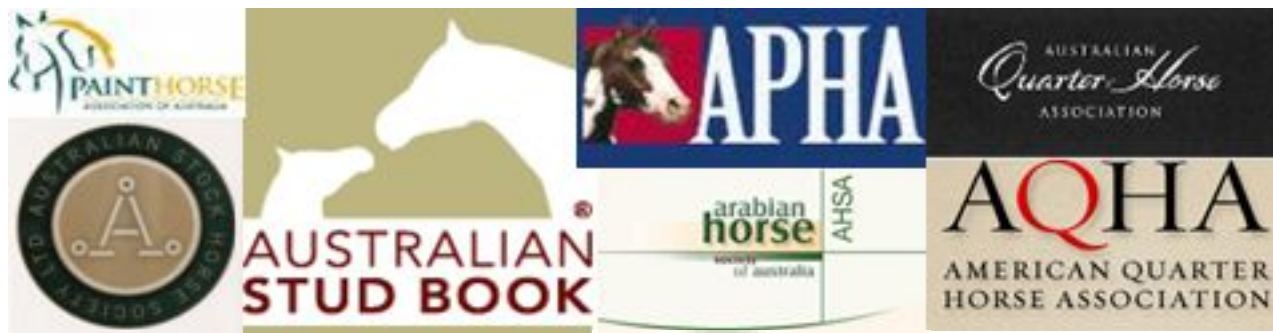

We believe that Glacial's pedigree will prove a hit for far more than his colour. For reasons above he crosses amazingly with Danehill line mares. Above is a picture of a very young filly foal out of a Danehill Dancer mare who's musculature is nothing short of amazing.

LOOK WHO CAME TO VISIT US AT THE CRUSH!!!

We could not believe our eyes when we spotted this Koala in the backyard when heading back for the afternoons work just last week. Seems WCF is a great place to be!!

WHATEVER YOUR BREED—WE'VE GOT WHAT YOU NEED!

Our stallions are registered with so many different Societies so that mare owners can reap the benefits. Foals born by our stallions, with your mares breed society, can mostly enjoy full registration. These Registrations being Breed registrations (not overseas colour club registrations) are valuable assets for Australian progeny to enjoy.

Make sure you choose the Stallions that are in a league of their own when it comes to type, size, colour genetics and eligible registrations for progeny!

Quotes worthy of mention

“You cannot plough a field by turning it over in your mind.”

~Author
Unknown

“Nothing in this world can take the place of persistence. Talent will not; nothing is more common than unsuccessful people with talent. Genius will not; unrewarded genius is almost a proverb. Education will not; the world is full of educated derelicts. Persistence and determination alone are omnipotent. The slogan “press on” has solved and always will solve the problems of the human race”

- Calvin Coolidge
